Terms of Use

The terms of use for this study can be found at:
<http://www.icpsr.umich.edu/icpsrweb/ICPSR/studies/35163/terms>

Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTE FOR # 35163
Collaborative Multi-racial Post-election Survey (CMPS), 2008
Public use data

1) Confidentiality:

- ICPSR has recoded numeric variables with sensitive information using top and bottom coding methods to protect respondent confidentiality.
- Values that were deemed as indirect identifiers (such as age, income, year of citizenship) ICPSR used a series of data coarsening techniques to protect for confidentiality.

2) Variable Recode:

- The following variables were recoded from string to numeric to improve the usability of the data:
 - **q29b_order**
 - **sample_type**
 - **State2**
 - **q45_split**

3) Question Text:

- Question text was added to the data based on the original data collection instrument deposited by the Principal Investigators.

4) Value and Variable labels:

- Value and Variable labels were standardized based on the original data collection instrument deposited by the Principal Investigators.
- Any spelling errors found in the value labels were corrected during ICPSR processing.

5) Missing Values:

- Missing values were standardized as per the study's convention.
- Values "88" and "99" (labeled as "Don't know" and "Missing" respectively) were left as valid responses in most variables at the request of the Principal Investigators.

ICPSR 35163

Collaborative Multi-racial Post-election Survey (CMPS), 2008

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

ICPSR has an FAQ on [copyright and survey instruments](#).

2008 Collaborative Multi-racial Post-election Survey (CMPS)

The 2008 CMPS is a national telephone survey of registered voters, with comparably large samples of African Americans, Asian Americans, Latinos, and Whites.

CMPS 2008 Survey Design and Methods

This telephone survey—conducted between November 9, 2008 and January 5, 2009—is the first multiracial and multilingual survey of registered voters across multiple states and regions in a presidential election. In contrast to the 2008 ANES which oversampled Black and Latino voters, and was available in Spanish, the CMPS was available in six languages and contains robust samples of the four largest racial/ethnic groups: Whites, Latinos, Blacks, Asians. The CMPS contains 4,563 respondents who voted in the November 2008 election and that self-identified as Asian, Black, Latino, and White, and was available in English, Spanish, Mandarin, Cantonese, Korean, Vietnamese and respondents were offered the opportunity to interview in their language of choice.

There are six states in the country where representative studies will yield robust samples of all four major racial groups. These states include California, Texas, New York, Florida, Illinois, New Jersey, and our statewide samples range from 243 to 669 cases. In order to arrive at more nationally representative samples of each minority group, we added two supplemental states per racial group, including Arizona and New Mexico (Latinos), North Carolina and Georgia (Blacks), Hawaii and Washington (Asians). Of these 12 states, 3 were considered political battlegrounds in the 2008 Presidential electorate – New Mexico, Florida, and North Carolina. In order to examine multi-racial politics in competitive and non-competitive environments, we supplemented our sample with six additional diverse battleground states : Colorado, Michigan, Nevada, Ohio, Pennsylvania, and Virginia. As of the 2008 election, two-thirds of the national electorate is concentrated in these 18 states. For Latinos, 92% of all registered voters reside in these states; 87% of Asian Americans; and 66% of Blacks, and 61% of Whites.

The sample was drawn of registered voters using the official statewide databases of registered voters, maintained by elections officials in each of the 18 states. For voters without listed phone numbers, records were enriched using a combination of public and private sources of consumer information by Catalist Data Services. The vendor classified the sample by racial/ethnic group based on a combination of variables: first and last name, population density, and consumer information. In 2008, Catalist had the most comprehensive database of registered voters and is particularly useful in studying multi-racial populations because of their classification methodology. All interviews were conducted by live interviewers, via telephone to landlines and mobile phone numbers when they were directly supplied by registered voters on the voter list. The survey contains an overall sample of 4,563 with a margin of error of 1.5% for the national sample, 2.5% for the Latino sample, and 3.2% for the White, Black and Asian samples. Overall, the AAPOR response rate-1 was 11.4% and response rate-3 was 41.9% The average survey length was 24.8 minutes.

Post-stratification weights were applied to correct for any discrepancies for age, gender, and education which may accompany telephone surveys. The November 2008 CPS provides estimates of the registered voter population by race, age, gender, and education level which we applied to our sample, by racial group, so that our distributions match those of the Census on these important demographic categories.

There are 51 items dealing with sociopolitical attitudes, mobilization and political activity. Additionally, there are 21 items that capture demographic information, including: age, ancestry, birthplace, education, ethnicity, marital status, number in the household, religiosity, gender, media usage and residential context.

2008 Collaborative Multiracial Post-Election Survey

Q25 [ALL] Okay, now I'd like to ask you about different ways people participate in politics. Most people we talk to are too busy to do any of these acts, while others have done one or two. Thinking about over the past 12 months, please tell me if you participated in any of the following:

Q25a. Gone to a political meeting or speech in support of a particular candidate or political party?

Value	Label	Latino	Asian	Black	White	Total
1	Yes	16.66%	14.28%	21.93%	19.75%	18.06%
2	No	83.34%	84.42%	77.84%	80.12%	81.60%
88	Don't know	0.00%	0.25%	0.23%	0.13%	0.13%
99	Refused	0.00%	1.06%	0.00%	0.00%	0.22%

Q25b. Worked as a volunteer for a particular candidate or political party?

Value	Label	Latino	Asian	Black	White	Total
1	Yes	7.93%	8.01%	16.76%	10.29%	10.38%
2	No	92.07%	90.72%	83.15%	89.56%	89.31%
88	Don't know	0.00%	0.00%	0.09%	0.14%	0.06%
99	Refused	0.00%	1.27%	0.00%	0.00%	0.26%

Q25c. Donated money to a candidate, political party or political organization?

Value	Label	Latino	Asian	Black	White	Total
1	Yes	15.74%	18.23%	23.87%	30.07%	21.61%
2	No	84.03%	80.13%	76.02%	69.57%	77.87%
88	Don't know	0.23%	0.38%	0.00%	0.31%	0.23%
99	Refused	0.00%	1.26%	0.11%	0.06%	0.29%

Q25d. Taken part in a protest or demonstration?

Value	Label	Latino	Asian	Black	White	Total
1	Yes	9.51%	6.67%	7.18%	5.40%	7.40%
2	No	90.37%	92.08%	92.55%	94.60%	92.25%
88	Don't know	0.11%	0.10%	0.27%	0.00%	0.11%
99	Refused	0.01%	1.15%	0.00%	0.00%	0.24%

Q25e. Tried to convince your friends or family to vote?

Value	Label	Latino	Asian	Black	White	Total
1	Yes	68.15%	64.80%	73.35%	69.90%	68.99%
2	No	31.77%	33.89%	26.30%	30.05%	30.63%
